

WIPP SHIPMENT INSPECTION LOCATIONS

USDOE should set procedures with each state that will conduct inspections of the WIPP transporter. The procedures should indicate which USDOE representative will notify which state representative and how soon prior to the inspection the notification will be given. States will provide and maintain a list of contacts for notification of inspections.

Notice to point-of-origin inspectors may best come directly from those preparing the shipment. Notice to en route inspectors should come from the drivers or the USDOE staff that monitors TRANSCOM. States and USDOE may make alternate arrangements to notify inspectors in an effective and timely manner.

STATE	INSPECTION REQUIRED	CONTACT/ RESPONSIBLE AGENCY	INSPECTION STATIONS / PORTS OF ENTRY (POE)
