

Process Diagram: Approval of SPSC Assumptions by TEPPC Stakeholders in creating the TEPPC Common Case

Other Notes:

1. LBNL provides technical support to SPSC and DSMTF, specifically the adjustments to loads and in the assessment and modeling of DR and DG.
2. Other studies, while they do not require stakeholder or TAS approval, have to be coordinated with DWG and MWG for implementation into datasets, and are encouraged to discuss development of the assumptions with the TAS working groups to leverage the working group members regional expertise.

Glossary of Acronyms:

SPSC: State/Provincial Steering Committee (and any of its work groups)

EE: Energy Efficiency

DR: Demand Response

DG: Distributed Generation

TAS: Technical Advisory Subcommittee

DWG: TAS Data Work Group

DSMTF: Demand-side Modeling Task Force

MWG: TAS Modeling Work Group

SWG: Studies Work Group
