

# WestConnect RTO

# Common OASIS

September 18, 2003

Jerry Smith

# SCOPE

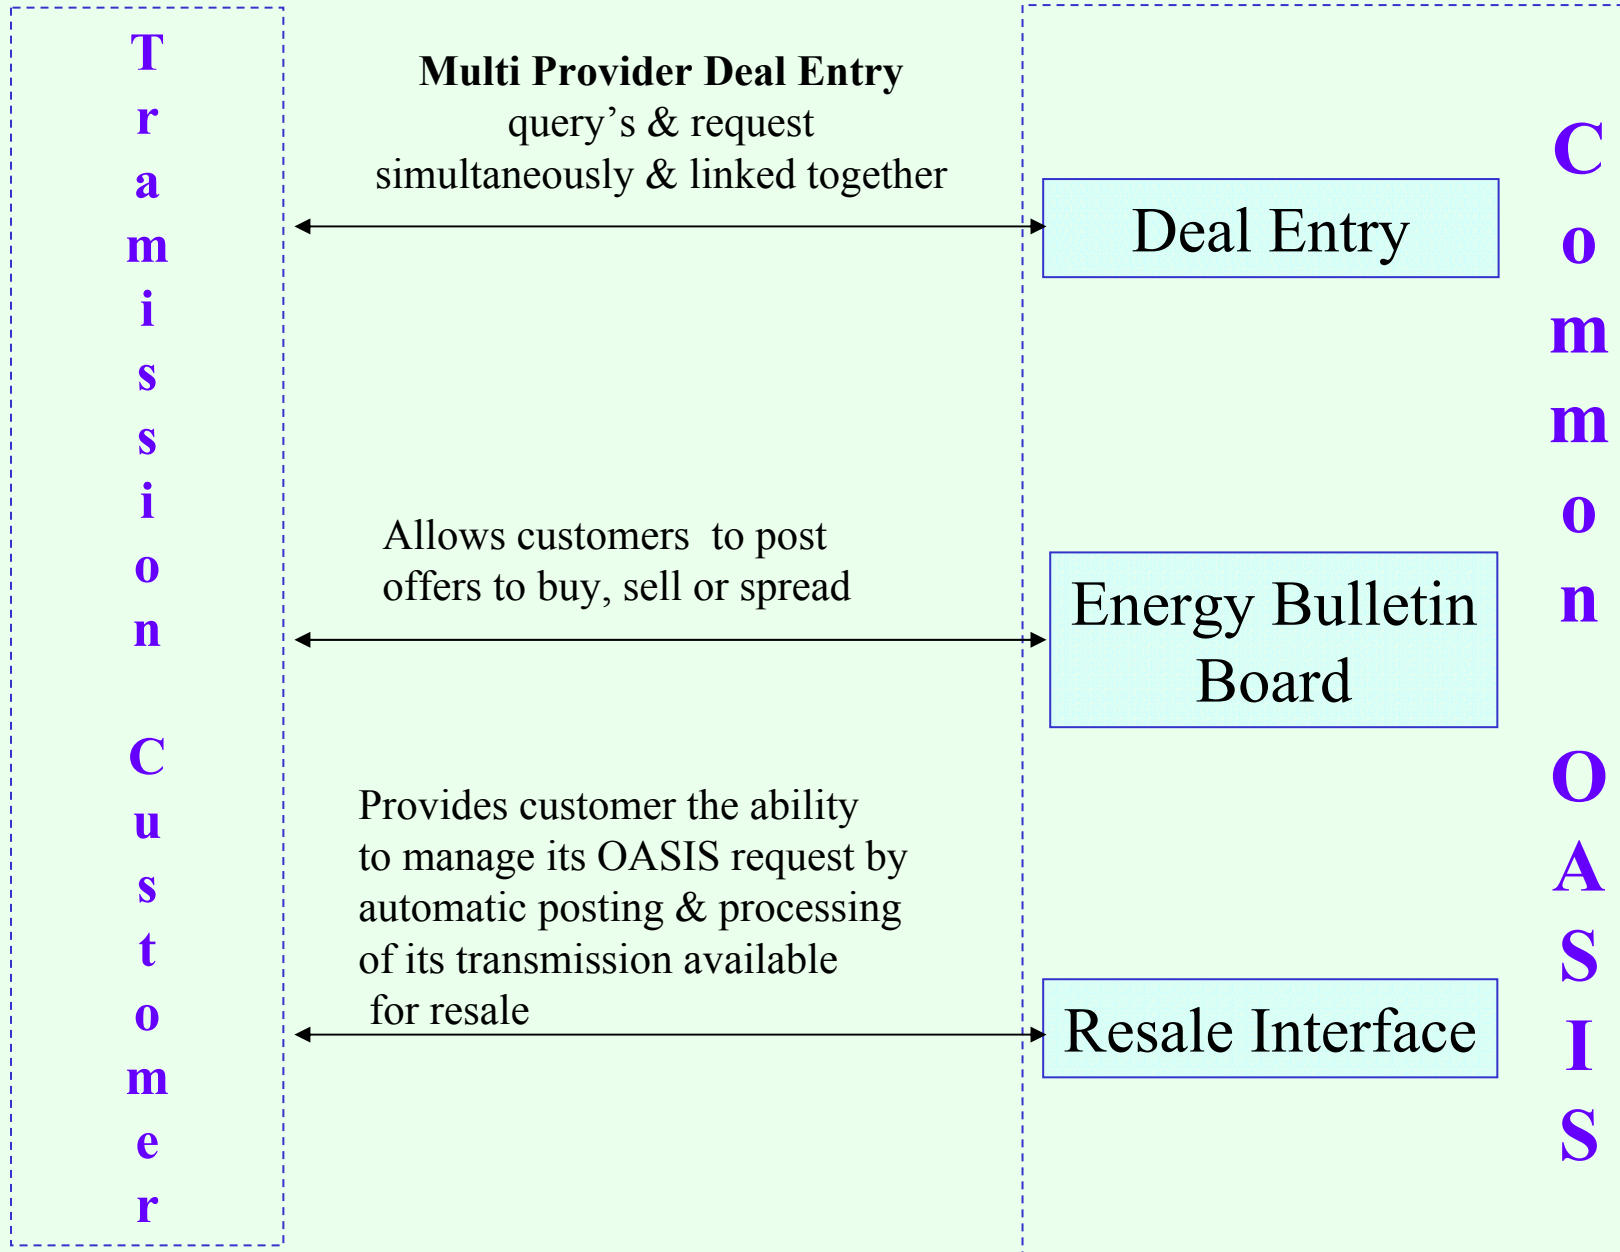

# USER INTERFACE

OATI webOASIS utilizes a web browser based user interface.

- Includes toolbars, dropdown lists, checkboxes, radio buttons, and push buttons.
- Tabular displays supports paging, sorting, and data filtering.
- On-screen data entry validation is provided
- Color coded depiction of request status
- Event alarming upon status change
- Seamless access to other OATI applications

# FEATURES

# Other OASIS Functions

- Purchase Transmission Service
- Purchase Ancillary Service
- View schedules, messages, etc
- Messaging
- Dynamic notification of transmission reservation updates
- Post Documentation and Provider Information
- Customer posting of reservations for resale including specification of different service increments and service types

# Deal Entry

- Ability to link individual paths to a single commercial path across multiple systems
- The capability to provide results based on system wide POR-POD querying capability, based on the path relationship data maintained by the Providers..
- Ability for a customer to select the POR/POD combination (across one or more Providers), save the query, then submit
  - The query would present the results across each POR/POD segment of each Provider
  - Allow the customer to select which Offerings they desire
  - Place each of those offerings into a single “Deal”.
- Ability to enter transmission requests to multiple transmission providers from a common display

# Deal Entry (cont.)

- Reservation Deal Entry control parameters include:
  - Capability to automatically Withdraw the reservation should any request be, denied by a provider,
  - Capability to set a withdraw timeout value to automatically withdraw the request at a certain point in time if all providers have not accepted the request
- Reservation Deal Summary display for Customers only to show the Reservation Deals linked together and each of their status values.

# Bulletin Board Features

Bulletin board only provides information and is not a clearinghouse.

- Dual display showing bids to sell energy and offers to buy energy all in one display shown side by side
- Display showing energy price spread offers from node to node
- Sell, Buy and Spread offers will have the following data: PSE, Buy/Sell/Spread, node(s), MW, price, Energy product, start date/time, and stop date/time and comment
- Display filters to narrow the list of data shown such as filter by duration of offers, by node, product, etc
- Sort capability by clicking on column heading such as price, MW, etc

# Bulletin Board Features (cont.)

Bulletin board only provides information and is not a clearinghouse.

- Automatic refresh of the data
- Ability for the PSE to modify/delete their buy/sell/spread offer posting
- Buy/Sell/Spread offer postings automatically are removed at the expiration time (expiration time to be set by PSE)
- Ability to 'drill down' into offer posting to get PSE contact information
- Complete audit log of buy/sell/spread energy postings

# Resale Features

- Quick selection of which TSR to re-post for resale
- Ability to select details of offering to be re-posted.
- Capability to offer the same path at multiple offer prices.
- Display for Reseller showing OASIS requests on resale
  - requests on secondary offerings
- Alarms for Resellers for incoming OASIS reservation
  - requests with the ability to page or email the Reseller
  - for notification of requests

# Resale Features (cont.)

- Upon OASIS change in status, automatic decrement or increment of all impacted OASIS offerings (monthly, weekly, daily, hourly)
- Upon purchase of a secondary offering, the secondary transmission request will contain information referencing the parent or original reservation.
- Ability to download to excel
- Auto retract feature configurable by the Customer
- Ability for Reseller to select/deselect those 3<sup>rd</sup> party customers that are not approved to do business with the Reseller
- Simple dollar credit limit, configurable by Reseller, for risk management purposes
