

RESOLUTION
of the
WESTERN STATES WATER COUNCIL
in support of the
WATER RESOURCES RESEARCH INSTITUTES
Bend, Oregon
July 29, 2011

WHEREAS, in the West, water is a vital and scarce resource the availability of which has and continues to circumscribe growth, development, our economic well being and environmental quality of life; and

WHEREAS, the wise use, conservation, development and management of our water resources is critical to maintaining human life, health, safety and property; and

WHEREAS, water resources research, the dissemination and application of research results and technology transfer are increasingly important to meeting our present and future water needs; and

WHEREAS, the Water Resources Research Act of 1964 authorized a program that included the establishment of state water resources research institutes (WRRIs) or centers in each state to address our water resources challenges; and

WHEREAS, today's institutes and centers provide a research infrastructure that uses the capabilities of universities to greatly assist and provide important support to western state water agencies in long-term planning, policy development and management of the increasingly complex challenges associated with water in the West; and

WHEREAS, these challenges are exacerbated by the uncertainty surrounding population growth, climate, and economic and environmental water demands; and

WHEREAS, the Council and its member states continue to work with the institutes/centers and the academic community to ensure research investments are relevant to our most pressing water problems and allow each state to solve its problems by methods most appropriate to its own situation; and

WHEREAS, the institutes/centers' outreach and information transfer services and activities are very valuable to the water communities in the various western states; and

Position No. 334
Revised and Readopted
(formerly Position No. 305 – 7/11/08)

WHEREAS, this is a very worthwhile federal-state partnership that promotes collaboration, cooperation and the conservation of limited physical, financial and personnel resources;

NOW THEREFORE BE IT RESOLVED, that the Western States Water Council asks the Administration and the Congress to maintain the federal authorization and financial support for the state water resources research institutes program – requesting and appropriating funds as appropriate.
